

FACT NEWS FOR JANUARY AND FEBRUARY

Unprecedented cold weather this winter has limited competition plus the economy presents a challenge to all of us to travel. This should have given us a boost to swim the postal swims, principally the 1-Hour Swim, which could be done in our own home pool. The results of this competition are scheduled to be published March 15 – keep an eagle eye out for our FACT participants throughout the state and any relays we may have entered. We continue to wonder why we do not have the participation we should for the size and breadth of our team. How simple it would be for each of our smaller teams to have a couple of days set aside to try the Hour swim. You can make it a fun episode and amaze yourself how far you can go – after all, most of you swim at practice more than an hour. This is just a continuous event. Keep it in mind for future postal swims – there are plenty of them listed on the usms.org website for the fitness program. While you're at it, try the Go The Distance program – it's growing by leaps and bounds and many on our team are involved.

Please remember when you are swimming outside our LMSC (in Gold Coast or other areas) to send in your results to Marly Wilson. It is up to the swimmer to report these to her for Top Ten and we have several meets outside our Florida LMSC coming up.

The entries for the State Meet in St Petersburg March 27-29 are due March 17th. I will be looking at the Psych Sheets before this meet and trying to put together some winning relays for us to help the Florida LMSC compete against the Gold Coast LMSC. This is going to be a tough competition and our FACT team will count as an individual team. We have a number of excellent swimmers on our Combined team and this is an opportunity for us to show what the Florida LMSC can do!! If you are entering the meet and WILL NOT be available for relays, please let me know by the 22nd of March so that I do not enter you as part of a relay team.

It was a pleasure to see so many of you at the Valentine Meet in Clearwater and I look forward to our keen competition at the State Meet in St Pete. I will look over the psych sheets for the Dixie Zone Championships and suggest relays, although I will not be attending. Remember our new policy is to pay for all relays, so if FACT is entering a relay at any of these meets, please notify us to reimburse you. Marianne Bradley is our Treasurer – bradleym@tampabay.rr.com.

I am continuing the inclusion of the advantages we determined when we formed the Florida Aquatic Combined Team in October of 2003 to keep our members informed and answer any questions you may have.

The Florida Aquatic Combined Team (FACT) is ideally composed of those members of the Florida LMSC who regularly compete and desire to join others to form a team that is competitive on a Zone, National and International level. We hoped to create camaraderie in line with USMS goals and give us all a chance to really know members of the other teams that comprise the Florida Combined Team. Although there are large clubs in this LMSC, it is a normal occurrence that approximately 10% of a team competes regularly (a local and national phenomena), and even less outside our LMSC – sometimes only 3 or 4 swimmers at Nationals and World's!! This makes for very weak representation on a national scale for one of the strongest swimming areas in the country!

- **We will refer to Clubs and Chapters within this information sheet as: CLUB: The USMS Registered Club (FACT, HLJ,CATM,SUN,SPM,FMM) CHAPTERS: Workout Groups or those affiliated with FACT (UNAF, SUNF, SARF, VASF, SPCF, TBAF)**
- **Meets within our LMSC can be Club or Chapter competitions.**
- **If the Meet Director is agreeable, team scores can be totaled by using their chapter designation, including relays made up of all SARF or VASF members, for example**
- **At all times consider that USMS only recognizes our REGISTERED team and results for Top Ten, Records, etc. will indicate FACT.**
- **All Clubs or Chapters remain autonomous financially and otherwise.**
- **There are no additional fees for membership in FACT other than a once-a-year $3.00 registration fee that covers FACT relays at all meets.**

We recommend that members of a Chapter who plan on any competitive swimming events be registered as FACT. Also, it is advantageous to maintain your club entity registration for communications purposes and for those totally non-competitive members.

MEMBERSHIP

Membership in FACT is voluntary at both the individual and chapter levels. Membership can include Unattached swimmers as well as swimmers who are members of Chapters.

FACT is an independent club in the Florida LMSC. It is not the LMSC club, it does not have special LMSC support, other than what is given to other independent clubs, and the LMSC does not exercise any control or responsibility other than what it does for any other registered clubs.

Can some members of a club join FACT while others choose not to?

Yes. It won't make any difference anywhere except at competitions, but be sure everyone understands the implications for competition.

How would that affect each person's USMS Registration?

As far as USMS is concerned, the Florida Aquatic Combined Team (FACT) and the local Club are two entirely different entities. To make things easier to understand, TBAY would be an example of a Club; TBAF would be a Chapter of the USMS registered Club of FACT, even though they may swim and workout together.

USMS Rules about membership and transferring membership:

USMS rules pertaining to registration:

- **There shall be only one USMS registration per individual permitted at any time. This means that swimmers may not register for the combined team and their local club. They will be considered a local chapter of FACT.**
- **In order for a swimmer to compete as a representative of a club, that club must be a member in good standing of an LMSC and USMS for the year a swimmer is registering. FACT is a registered Club of LMSC and USMS.**
- **A swimmer shall not REPRESENT any club in competition for 60 consecutive days before transferring affiliation to another club, unless this transfer takes place at the time of annual registration.**

FEES

What about registration fees?

All local club registration fees would still go to the local club/chapter, which would set its own fees. Members of the FACT Chapter have an additional $3.00 fee to cover office and relay expenses of the FACT Treasurer. UNATTACHED FACT swimmers, who would not be paying local club fees along with their $3 FACT fee, must be sure to send their $3.00 fee to the FACT treasurer, currently: Marianne Bradley, 869 Manning Road, Palm Harbor, FL 34683. Questions: bradleym@tampabay.rr.com. Failure to pay this small fee will mean you will not appear on the roster as FACT when we are forming relays, so PLEASE make our life easier and follow these simple instructions.

What about local club dues and other fees?

Local groups are and always continued to be independent groups that set their own pool fees, coaching fees, dues, and whatever else they already do. Nothing changes at the local level! FACT chapter and Local Club can still speak to each other

(aquaquack), practice in the same lanes, attend the same social functions, volunteer to help at chapter and club events, and everything else they've always done.

COMPETITION

Competition rules are covered on the Florida LMSC website, floridalmsc.org under Form & Registration: Explanation of FACT competition in Local and National Meets.

RECORDS & TOP TEN

All new individual and relay records set by members of the combined team will be listed with the combined team designation and must be reported to the LMSC Top Ten and Records Chair as such, not with the individual chapter designations. Because the combined team is the only official USMS-registered club, club affiliation with record performances need to be consistent at the LMSC, ZONE, USMS and FINA levels.

ADVANTAGES FOR SMALL CLUBS

- **At meets within and outside the LMSC, individuals can participate in relay events.**
- **Relays can be created in a variety of age groups**
- **Socially, it provides an opportunity for increased involvement in Masters swimming, makes Masters swimming more enjoyable, and encourages people to become involved in Masters swimming.**
- **Relays tend to be "bonding" types of events, so individuals get to know swimmers from other small clubs and are more likely to attend meets if they know they are swimming on a relay.**
- **If one of the chapters has a coach who attends meets, the coach offers suggestions and tips to other swimmers on the combined team.**

ADVANTAGES FOR LARGE CLUBS

- **The likelihood of putting together national championship and All-American relays is much greater.**
- **The likelihood of winning National team championships is greater.**
- **At National and International competitions where attendance is usually small, combined team members have a greater opportunity to create competitive, winning relays and contend National titles.**
- **The elite swimmers already know each other and have no problem putting together relays; however, they are often in need of a certain age, stroke and**

gender and members of the combined team have a great chance of participating and contributing to a team effort.

RELATED ITEMS:

- **Swimwear with the current logo is available through Agon Swim Wear on the Internet.** http://www.agonswim.com/cgi-bin/sales1/agreement.cfm?ClientID=17991&AgreementID=1. **Or contact Nick@agonswim.com.**
- **We currently have a few t-shirts (white and navy) and swim caps available if anyone is interested. Please contact: Joan Campbell for prices and size availability. (jcampb10@tampabay.rr.com)**
